Vishal Singh

Conversational AI Engineer

singh96vishal30@gmail.com +91 8961593626 Bangalore, India linkedin.com/in/vishal-singh-834986199

PROFILE

Conversational AI and Backend Engineering professional with 7+ years of experience building enterprise automation solutions, scalable backend systems, and conversational workflows. Skilled in enterprise integrations, workflow automation, API engineering, and technical leadership across finance, insurance, healthcare, and telecom domains.

WORK EXPERIENCE

Lead Engineer - Conversational AI, *EXL Services* 10/2024 – Present
- Leading development initiatives for enterprise conversational AI and automation solutions in finance and insurance domains.
- Collaborating with stakeholders and architects to design scalable conversational workflows and backend integrations.
- Mentoring developers and contributing to technical solutioning, delivery planning, and enterprise automation initiatives.

Senior Software Engineer - Backend, *Rakuten India* 10/2022 – 10/2024
- Developed scalable backend services and REST APIs for enterprise subscription and onboarding platforms using microservice architecture.
- Built backend solutions for enterprise B2B platforms including client lifecycle management, authorization workflows, activation scheduling, renewals, and contract management.

Senior Software Engineer - Conversational AI R&D, *Quantiphi* 08/2021 – 10/2022
- Built backend middleware and integration capabilities for enterprise conversational AI platforms.
- Worked on integrations with CRM, HR, healthcare, and enterprise systems including Salesforce, SAP, ServiceNow, and Zendesk.
- Developed scalable backend services and orchestration layers supporting intelligent automation workflows.

Software Engineer - Conversational AI, *Amelia, an IPsoft company* 12/2019 – 08/2021
- Delivered enterprise conversational AI and virtual assistant solutions for multiple clients.
- Built omnichannel conversational experiences and integrated enterprise systems using RESTful APIs.
- Worked on workflow automation, backend integrations, and production chatbot deployments.

Associate Software Engineer - Enterprise Data Warehouse, *CGI Information Systems* 09/2017 – 12/2019
- Developed ETL workflows and automated deployment processes for telecom domain projects.
- Reduced manual operational effort through Python and Bash-based automation scripts.

EDUCATION

BTECH (Computer Science), *Bengal Institute Of Technology (WBUT)*

SKILLS

Conversational AI & Automation — Proficient
Conversational Workflows, Enterprise Automation, Intelligent Automation, System Integrations

Backend Engineering — Competent
Node.js, JavaScript, TypeScript, NestJS, ExpressJS, REST APIs, Microservices

Tools & Technologies — Amateur
Redis, Firebase, MySQL, Docker, Git, TypeORM

PROJECTS

Enterprise RAG Assistant
Built a Retrieval-Augmented Generation (RAG) assistant with conversational memory, document retrieval, and context-aware response generation for enterprise knowledge workflows.

Insurance Claims AI Assistant
Developed an AI-powered claims assistance workflow for insurance use cases involving conversational intake, policy validation, and intelligent response orchestration.

Multi-Agent Customer Support System
Designed a multi-agent conversational workflow system capable of intent routing, escalation handling, and contextual task execution across customer support scenarios.
